

Portable Design Wall

Supplies needed:

- 4 10 foot $\frac{3}{4}$ " diameter pvc pipe
- 4 elbows to fit pipe
- 4 straight connectors to fit pipe
- 3 yards of 108 inch wide flannel
- 4" or Larger spring clamps (I have 20) to hold the fabric onto the pipes.

Cut pvc pipe into 8 four foot lengths (you will have one 2 foot length left over from each pipe.)

You can now configure your design wall to be an 8'x8' wall, 8'x6' wall, etc..by using the connectors to make the lengths you need. Just add the flannel and you now have the design wall you need.

You can make a bag to store all the stuff and have it waiting for your next quilt design.
